Re: Kenneka Jenkin's Crowne Plaza Forensic Video Analysis Request

Mr. Sallet or To Whom It May Concern:

Over 100,000 people who care about Kenneka Jenkins and others who want to get to the bottom of what really happened have no confidence in the Rosemont police department investigation into Kenneka Jenkins' death.

We have seen too many discrepancies to accept an accidental death. Below are provided a few of hundreds video screen shots that add insight into what happened to Kenneka Jenkins. FBI has the technology to locate, in the released video, specific places in the images below and perform forensic analysis.

Thank you to all of you who did the research on YouTube and Facebook and pointed out these issues. There are hundreds of you who researched this case in one way or another. Thank you to each and every one of you.

There are many video clips on YouTube. Only a few were selected that stood out the most to help the FBI get started.

There is no way Jenkins could have walked down any steps without falling. She could barely walk straight. Also, many video clips and images appearing to be Jenkins appear to be doctored in our opinion. In addition, the red rectangles indicating movement do not show up in many of the clips where there is movement.

Our condolences go out to Kenneka Jenkins mother, Teresa Martin, and we pray this crime will be solved.

Kenneka was next to someone against the wall in the hallway. He is tall and has on a black hoodie. You can see both his hand and face at one point.

Notice Jenkins walking fast into the kitchen without wobbling but then slowing down and wobbling. Someone was walking her at a fast past and was then faded out.

You can also see 3 shoes, one lagging behind Jenkins shoes.

This woman prepared something for someone to drink, perhaps water from the bathroom. We need to find out what and ask the girl who asked her who she was about to give that drink to.

At some portions of video, one can see that people have been edited out, that there are time discrepancies, and Jenkins appears in odd places at odd times.
